PROFESSIONALS IN PALLETS & PACKAGING

Foresco is a pioneer in sustainable solutions for wooden pallets and packaging. With a strong focus on quality, flexibility, reliability, sustainability, and safety, we strive for a leading role in the circular economy. Our ambition: to be the most respected company in our industry – for our customers, our employees, and our environment.

QUALITY

We bring together the best knowledge and experience in our sector to fully unburden customers in the way that suits them best and respects the environment.

FLEXIBILITY

Solution-oriented with innovative services and products. Always the fastest response time in the market with systems optimally integrated with our customers' systems.

SUSTAINABILITY

A leader in sustainable business practices. Forging towards CO_2 neutrality in a future where re-use and efficiency are central. We focus on digitisation and sustainability.

SAFETY

Safety comes first. We create a safe working environment by focusing on responsibility, training, and proactive measures.

RELIABILITY

We produce, sort, and repair. We always deliver. Always on time. Locally. We are the preferred partner for companies largely based in Belgium, the Netherlands, Luxembourg, Germany, and Scandinavia.

Commercial Director

Karen Plessers
CFO

Wim van Dijk
Country Manager the Netherlands

Maarten Maes
Head of Transformation

Johan Pauwels
Group IT Manager

FORESCO
PALLETS | PACKAGING

BUSINESS UNITS

NEW PALLETS
New pallets are delivered both custom-made and standardised, always meeting the highest requirements of various industries. As a leading producer, Foresco only purchases wood from PEFC-certified suppliers.

USED PALLETS
Foresco collects used pallets, sorts them and assesses them for quality. Suitable pallets are reused, while damaged ones are repaired and sold as a sustainable and cost-effective alternative to new pallets.

PACKAGING
Foresco provides custom-made packaging solutions for, among others, the steel industry, mechanical engineering, the automotive sector, and medical technology with a focus on safe, efficient, and sustainable transport. We also work on-site if the project involves large machines and complex shipments.

SERVICE TO PALLET POOL COMPANIES
Specialised services focusing on sorting and repairing pallets for pool companies. Pallets are assessed for quality and usability, and damaged ones are repaired according to strict standards, as agreed with the customer.

FORESCO COLLECT, REPAIR & RE-USE

Thanks to our innovative software platform, customers can easily have their own used pallets collected and can then re-use them. This makes the pallet management process efficient, transparent, and well-organized. Damaged pallets are repaired according to strict quality standards and then returned.

Collect, Repair & Re-use combines sustainability with cost savings and extends the lifecycle of pallets.

WE ONLY USE 100% RECYCLED OR PEFC TIMBER

FOCUS ON SUSTAINABILITY

Striving for 100% circularity
Focus on re-use, repair, and recycling.

CO_2 reduction
Scope 1 and 2 - 50% less emissions by 2030, scope 3 - 33% less emissions by 2030. Transport optimisation and import by boat (65% less emissions).

Raw materials
Purchase only from PEFC-certified suppliers, supplemented with recycled wood from used pallets.

Electrification
Complete switch to electric forklifts and testing the use of the first electric lorries.

Energy management
Local solar energy and batteries provide a significant part of our energy needs.

Waste recycling
Residual materials are converted into chipboard or used for energy generation.

Disclaimer
We comply to the PEFC ST 2002:2020 standard using controlled sources.

WORKING TOGETHER FOR A SUSTAINABLE FUTURE

At Foresco, we believe that success and sustainability go hand in hand. We continue to build a circular economy, thanks to our innovative solutions, strong partnerships, and an unwavering commitment to our core values.
